FreiLacke

EFD-Info

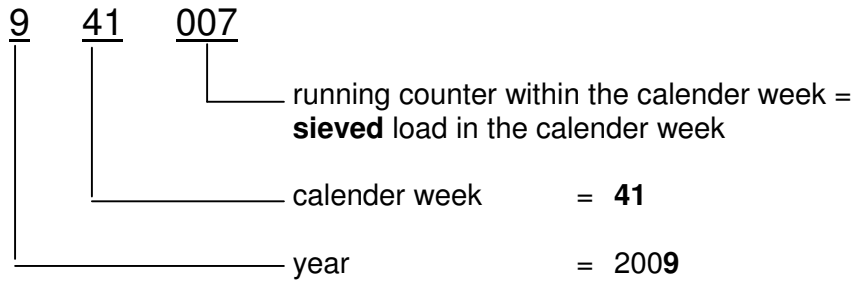
Explanation
Batch – Number

For the traceability on the date of manufacture and for the determination of the date for the workability the following system uses **Frei**Lacke“ for the marking.

The date of manufacture results from the batch number the date for the workability on the label of each packing is directly indicated.

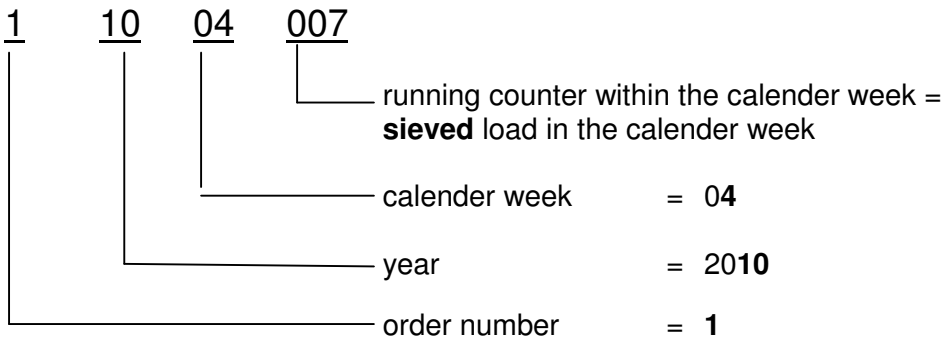
Before january 2010 – batch number 6 places

Example: Batch-Number: 941007 (6 places)



Starting january 2010 – batch number 8 places

Example: Batch-Number: 110004007 (8 places)



A storage beyond the indicated period means not necessarily that the commodity is useless. An examination of the characteristics necessary for the respective targeted application is however in this case for reasons of the quality assurance essential.

The conditions for the bearing endurance, indicated in our technical data sheets and labels,refers to the long-term storage. A short term under or excess of the temperature around 5°C, e.g. during transport does not have influence on the characteristics of the product.

Our technical data sheets are to advise you according to our latest state of knowledge. This information does not release you from own tests of our products in view to the ability for the intended procedures and applications. The sale of our products is an accordance with our terms of business and delivery.
